— SOLUTIONS —

HAILEY, IDAHO • 20+ YEARS IN THE VALLEY

IT that just works, from people down the road.

We keep small businesses in the Wood River Valley running: computers patched and protected around the clock, security that never switches off, and a partner who knows your business and where you want it to go.

20+ years

living and working in the valley

One number

to call, and a person you know answers

Whole valley

Bellevue to Ketchum, and everything in between

Built for offices of 1 to 100 people.

Real estate and professional offices, medical practices, highway and water districts, co-ops, non-profits, shops, and trades. If you run a small business in the valley, this is sized for you.

Book a walkthrough of your office.

Call 208-481-0984

Monday to Friday, 9am to 5pm Mountain • riverguard.solutions/visit

Four things, done properly.

Not a menu of forty line items. Just what a small business actually needs.

Managed IT and monitoring

Your computers stay updated and protected, around the clock.

- Updates on a schedule you approve, not at 9am on a Monday

Help desk

A person you know answers. Not a queue, not a script.

- Phone, email, or one click from your desktop

Managed security

Detection and response on every computer, 24/7, and a plan for when something gets through.

- Compromised machines isolated automatically to stop the spread

On-site service

We drive to you, anywhere in the valley.

- Honest end-of-life advice, never a replacement you don't need

A partner, not a vendor

We're in Hailey, we know your office, and we sit on your side of the table. We learn what your business is trying to do this year and plan the technology around it, so every recommendation is about your goals, not a quota.

Navigating AI in your business

AI is changing how small offices work, and the pace isn't slowing down. We help you sort out where it genuinely helps, where to keep it away from your data, and how to bring your staff along, so you're making decisions instead of reacting to them.

What we won't do:

sell you fear · name-drop vendors · replace what's working · talk over your head

Already have an IT person or team? We work with them, not around them. They keep the job and the local knowledge; we bring the tooling and coverage they don't have time to build.
